

A ship in port is safe, but that's not what ships are built for.
(Grace Murray Hopper)

Dear reader,

Manny times it was told that 'if something has to be done, it has to be done right'. We start to conduct this thesis in 2007, and here, as you can see, we open fourth year of publishing of ours and yours journal *Acta Kinesiologica*. This issue too, we can accentuate with undisguised pleasure, continues its travelling all over the World. This time we have to thank ladies and gentleman from famous world bases 'Genamics Journal Seek', 'Open J-Gate' and 'Electronic Journals Index (SJSU)' that accept *Acta* in their auspice and in that manner allow to Journal additional American and Asian promotion. Apart of already included, new famous authorities joined us, from Brazil, Estonia, Japan, New Zealand, Romania, Spain, Tunisia, USA, Great Britain. We give them thanks on their trust, and that is, as always, honor and obligation for all of us. According to all mentioned, in this issue, we hope, you will find articles that will scientifically intrigue you and interested you. In methodological sense we offer articles about universal movement classification, about hierarchical structuring of knowledge in sport games, and about expert system for talent identification in dance. In biomedicine domain we offer articles about physiological basics of learning, sole arch indices of footballers, hyperoksy as a form of disburdening, and there are also attitudes about training means of recovery. Educational section contains analysis of balance improvement by unicycling, research of lordotic poor posture of pupils, and article about nutritional status of primary school pupils. Management is engaged with sociological structuring of female grammar school students decision making, and with motivation for leisure time exercise in recreation. Finally, sport is represented with model of morphological characteristics in swimming, relations between morphologic dimensions and sport achievement in swimming, relations between specific and basic motor dimensions in boxers, with training influence on coordination of female handball players, and here you can find articles about specific roles of three types of basketball players and article about role of waterpolo guard. Although several received articles we have to reject, please do not be discouraged, because as you can see accepted articles are really valuable, perform journal and authors respectable, so we invite you to send your researches, because, as it was told, something like this deserve to be done right. You can be sure we will continue on this pathway.

Brod je siguran u luci ali radi toga se brodovi ne grade.
(Grace Murray Hopper)

Dragi čitatelju,

Mnogo puta je rečeno da ako nešto treba uraditi, onda to treba uraditi dobro. Mi smo još 2007.g. započeli ovu tezu provoditi u djelo i evo, kako se vidi, otvaramo i četvrtu godinu publiciranja našeg i vašeg časopisa *Acta Kinesiologica*. I ovaj broj, to s neskrivenim zadovoljstvom navodimo, nastavlja svoje putovanje diljem svijeta. Ovaj put potrebno je zahvaliti gospodi iz poznatih svjetskih baza 'Genamics Journal Seek', 'Open J-Gate' i 'Electronic Journals Index (SJSU)' koji su *Actu* prihvatili u svoje okrilje te tako časopisu omogućili dodatnu Američku i Azijsku promociju. Osim već uključenih, pridružili su nam se i novi poznati autoriteti iz Brazila, Estonije, Japana, Novog Zelanda, Rumunjske, Španjolske, Tunisa, USA, Velike Britanije. Zahvaljujemo im na povjerenju, a to je, kao i uvijek, za sve nas čast i obveza. Slijedom svega toga, nadamo se da ćete i u ovom broju pronaći priloge koji će vas zaintrigirati i zainteresirati. U metodološkom smislu moguće je pronaći članke o univerzalnoj klasifikaciji gibanja, o hijerarhijskoj strukturiranosti znanja u sportskim igrama i ekspertnom sustavu za otkrivanje talenata u plesu. U domeni biomedicine ponuđeni su članci o fiziološkom temelju učenja, svodu stopala nogometaša, hiperoksiji kao obliku rasterećenja u sportu, a tu su i stavovi o trenažnim sredstvima oporavka. Edukacijski blok sadrži analizu poboljšanja ravnoteže monociklom, istraživanje o lošem držanju učenika te prilog o nutricionističkom statusu učenika osnovne škole. Menadžment se bavi sociološkim strukturiranjem odlučivanja gimnazijalki i motivacijom vježbanjem u slobodno vrijeme u rekreaciji. Konačno, prilozi iz sporta bave se modelom morfoloških značajki u plivanju, relacijama morfoloških dimenzija i plivačkog rezultatskog postignuća, odnosima specifičnih i temeljnih motoričkih dimenzija boksača, utjecajem treninga na koordinaciju rukometašica, a tu su i prilozi o specifičnim ulogama tri tipa igrača u košarci i braniča u vaterpolu. Iako smo dosta članaka morali vratiti, neka vas to ne obeshrabri, jer kako vidite prihvaćeni prilozi su zaista vrijedni, čine i časopis i autore cijenjenima, pa vas i dalje pozivamo da šaljete svoje priloge, jer kako je već rečeno, ovako nešto zaista zaslužuje da se uradi dobro. Budite sigurni da ćemo tim putom i nastaviti.
