

*You see things; and you say "Why?" But I dream things that never were; and I say "Why not?"*  
George Bernard Show

*Dear reader,*

*With unconcealed proud we can point that this journal issue was prepared in extremely delightful (although binding) environment. Namely, because of continuity and quality endeavor our journal obtain a great acknowledgement – it is included in ProQuest CSA Physical Education Index base, and that is really great achievement. It is necessary to thank eminent professionals in ProQuest/CSA that recognize our effort and articles quality, as well as to all our cooperatives that make such step possible.*

*In the same manner, this issue offers numerous substantial articles. It is possible to find extremely interesting articles of education and kinesitherapy: about physical inactivity of youth, oriental dance with female students, fitness with college students, prevalence of foot deformity with kids and programming work in sport games with grammar school students. Moreover, in the space of sport: trend analysis of woman handball championship, factor structure of boxers, situation profile of K-1 tournament winners, analysis from basketball world championships and effects of complex training in football. Methodologically oriented articles offers: scientific approach to tactic models in sport games, new model of tennis serve, thereby kinematical analysis of tennis serve with kids, multivariate selection analysis, concept of developing groups in team sports and meta-model of skier development. Finally, we include nice researches from sports management: about media exposure of team sports and optimization of sports organization structure.*

*We hope that any of you can find interesting details in journal and we invite you to send us your papers with all aspects of kinesiology.*

*Editor-in-Chief  
Assist. Prof. Žarko Bilić, PhD*

*Vi vidite stvari i pitate "Zašto?" Ali ja sanjam o onome što nije bilo i pitam "Zašto ne?"*  
George Bernard Show

*Dragi čitatelju,*

*S neskrivenim ponosom možemo naglasiti da je ovaj broj časopisa pripreman u posebno ugodnom iako obvezujućem ozračju. Naime zbog stalnosti i nastojanja na kvaliteti pobrali smo veliko priznanje te je časopis uvršten u ProQuest CSA Physical Education Index bazu, što je zaista veliko priznanje. Treba zahvaliti eminentnim stručnjacima u ProQuest/CSA koji su prepoznali naš trud i kvalitetu priloga, kao i svim našim suradnicima koji su učinili da taj korak bude moguć.*

*U istom tonu, i ovaj broj nudi veliki broj sadržajnih priloga. Tako je moguće naći iznimno zanimljive članke iz edukacije i kineziterapije: o tjelesnoj neaktivnosti mladih, orijentalnom plesu kod učenica, fitness programu kod studenata, učestalosti deformiteta stopala djece i efektima programiranog rada u sportskim igrama srednjoškolaca. Također, u prostoru sporta: trend analizu rukometnog europskog prvenstva za žene, faktorsku strukturu boksača, situacijski profile K-1 pobjednika, analizu sa svjetskih prvenstava u košarci i efekte kompleksnog nogometnog treninga. Metodološki orijentirani prilozi nude: znanstveni pristup modelima taktike u sportskim igrama, novi model teniskog servisa, s tim u vezi kinematičku analizu teniskog servisa kod djece, analizu multivarijantne selekcije, koncept razvoja grupa u timskim sportovima i meta-model razvoja skijaša. Konačno tu su i lijepi prilozi iz managementa: medijska eksponiranost nekih sportova i optimizacija strukture sportske organizacije.*

*Nadamo se da svatko od vas može pronaći zanimljive detalje u časopisu, te vas pozivamo da nam pošaljete svoje priloge sa svim aspektima kineziologije.*

*Glavni urednik  
doc.dr Žarko Bilić*
